

CABANA

GIPS® Composite Reports

April 2024

thecabanagroup.com

Investment advisory services provided by Cabana LLC, an SEC registered investment adviser. The firm only transacts business in states where it is properly registered, or is excluded or exempted from registration requirements. Registration as an investment adviser is not an endorsement of the firm by securities regulators and does not mean the adviser has achieved a specific level of skill or ability. Additional information regarding Cabana LLC including its fees, can be found in Cabana's Form ADV, Part 2. A copy of which is available upon request or online at www.adviserinfo.sec.gov.

Our commitment to fair representation and transparency.

Cabana Asset Management claims compliance with the Global Investment Performance Standards (GIPS®). The firm has been independently verified on a firm-wide basis for the period January 1, 2012 to December 31, 2022. All of the included portfolios have been independently examined from portfolio inception to December 31, 2022.

Global Investment Performance Standards

What is GIPS®?

GIPS® is a globally accepted methodology for calculating and presenting investment firms' performance history and is widely relied upon by investment firms, their clients, and prospective clients for ensuring consistency of investment firm results. GIPS® is considered the “gold standard” for investment advisors.

How does GIPS® impact investors?

GIPS® allows firms to compete globally and provide investors with the ability to make comparisons between investment firms and composites. It was designed to provide assurance for investors who want reliable performance metrics based on the principles of fair representation and full disclosure. The CFA Institute provides an overview of why GIPS® compliance matters to investors and it can be found at <https://www.cfainstitute.org/en/ethics-standards/codes/gips-standards> .

More about GIPS

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

To receive a GIPS report, performance examination, our firm's verification report(s), and/or list of composite descriptions, please email your request to info@cabanaportfolio.com.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Independent Accountant's Verification Report

Management of
Cabana Asset Management:

We have examined whether Cabana Asset Management (the "Firm") has, for the periods from January 1, 2020, to December 31, 2022, established policies and procedures for complying with the Global Investment Performance Standards (GIPS®) related to composite and pooled fund maintenance and the calculation, presentation, and distribution of performance that are designed in compliance with the GIPS standards, as well as whether these policies and procedures have been implemented on a firm-wide basis. The Firm's management is responsible for its claim of compliance with the GIPS standards and the design of its policies and procedures. Our responsibilities are to be independent from the Firm and to express an opinion based on our examination.

Scope of Work

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about the Firm's compliance with the previously mentioned requirements; evaluating the design of the Firm's procedures previously referred to; and performing the procedures for a verification required by the GIPS standards, which includes testing performed on a sample basis, and such other procedures as we considered necessary in the circumstances. Verification does not provide assurance on the operating effectiveness of the Firm's controls or policies and procedures for complying with the GIPS standards, nor does it provide assurance on any specific performance report. We believe that our examination provides a reasonable basis for our opinion.

Opinion

In our opinion, for the periods from January 1, 2020 through December 31, 2022, the Firm's policies and procedures for complying with the GIPS standards related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been, in all material respects,

- Designed in compliance with the GIPS standards, and
- Implemented on a firm-wide basis.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

* Performance is for a partial period from October 1, 2016 to December 31, 2016.

Period - As of 12/31/2023	Gross Returns	Net Returns	US Fund Returns	Morningstar Conservative TR Returns
1-Year	3.92%	1.87%	10.65%	7.74%
5-Year	3.99%	1.93%	5.66%	3.15%
Since-Inception	4.11%	2.05%	4.44%	2.69%

*Since-inception performance is calculated for the period beginning October 1, 2016.

*Performance is annualized for periods greater than 1 year.

Multi-Strategy Conservative Composite: Cabana's Multi-Strategy Conservative Portfolio is one of four in Cabana's Multi-Strategy Professional Series. The objective of this portfolio is to seek a limited volatility range and capital preservation with opportunity for growth. It primarily invests in broad asset class ETFs among the five major asset classes. Allocation is typically weighted toward low beta asset classes. Risk parameters are managed using inversely- and non-correlated assets. Conservative investors seeking a lower (or reduced) volatility range may find this portfolio attractive. It is the most conservative portfolio in this series. Prior to January 2024, this portfolio was known as Cabana's Target Drawdown Professional 7. Prior to January 2024, the composite was measured against the Morningstar Moderate TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 25% SPY/75% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Conservative TR and US Fund benchmarks. Performance presented prior to September 17, 2020 represents the Target Drawdown 7 Composite. The Multi-Strategy Conservative composite is compared against the Morningstar Conservative TR and the US Fund. The Multi-Strategy Conservative composite has a minimum of \$25,000. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Multi-Strategy Conservative composite was created in September 2020 and incepted on October 1, 2016.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions and limited pooled fund descriptions are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Multi-Strategy Conservative has had a performance examination for the periods October 1, 2016 through December 31, 2022. The verification and performance examination reports are available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring an aggregation of client-initiated significant cash inflow or outflow of at least 10% of portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Benchmarks:

Morningstar Conservative TR - The Morningstar Conservative Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities. The Morningstar Conservative Target Risk Index generally aims for a tactical allocation of 20% global equity exposure and 80% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

10-Year	5.49%	3.07%	3.44%	4.50%

*Performance is annualized for periods greater than 1 year.

Multi-Strategy Moderate Composite: Cabana's Multi-Strategy Moderate Portfolio is one of four in Cabana's Multi-Strategy Professional Series. It has the longest-running track record of all Cabana portfolios. The objective of this portfolio is to seek a balance of growth and capital protection. It primarily invests in broad asset class ETFs among the five major asset classes. Risk parameters are managed using inversely- and non-correlated assets. Investors seeking risk management and a moderate volatility allocation may find this portfolio attractive. Prior to January 2024, this portfolio was known as Cabana's Target Drawdown Professional 10. Prior to January 2024, the composite was measured against the Morningstar Moderate TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 50% SPY/50% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderately Conservative TR and US Fund benchmarks. Performance presented prior to September 17, 2020 represents the Target Drawdown 10 Composite. The Multi-Strategy Moderate composite is compared against the Morningstar Moderately Conservative TR and the US Fund. The Multi-Strategy Moderate composite has a minimum of \$25,000. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Multi-Strategy Moderate composite was created in September 2020 and incepted on January 1, 2012.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Multi-Strategy Growth Composite: Cabana's Multi-Strategy Growth Portfolio is one of four in Cabana's Multi-Strategy Professional Series. The objective of this portfolio is to seek growth within long time horizons. It primarily invests in broad asset class ETFs among the five major asset classes. Risk parameters are managed using inversely- and non-correlated assets. This portfolio may be appropriate for investors seeking growth opportunities with tolerance to a higher volatility asset allocation. Prior to January 2024, this portfolio was known as Cabana's Target Drawdown Professional 13. Prior to January 2024, the composite was measured against the Morningstar Moderately Aggressive TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 75% SPY/25% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderate TR and US Fund benchmarks. Performance presented prior to September 17, 2020 represents the Target Drawdown 13 Composite. The Multi-Strategy Growth composite is compared against the Morningstar Moderate TR and the US Fund. The Multi-Strategy Growth composite has a minimum of \$25,000. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Multi-Strategy Growth composite was created in September 2020 and inception on October 1, 2016.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions and limited pooled fund descriptions are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Multi-Strategy Growth has had a performance examination for the periods October 1, 2016 through December 31, 2022. The verification and performance examination reports are available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring an aggregation of client-initiated significant cash inflow or outflow of at least 10% of portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

This index covers a global set of stocks, bonds, and commodities. The Morningstar Moderate Target Risk Index generally aims for a tactical allocation of 60% global equity exposure and 40% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

* Performance is for a partial period from October 1, 2016 to December 31, 2016.

Period - As of 12/31/2023	Gross Returns	Net Returns	Morningstar Moderate TR Returns	US Fund Returns
1-Year	9.12%	6.96%	13.23%	10.65%
5-Year	6.22%	4.12%	7.39%	5.66%
Since-Inception	5.39%	3.30%	6.38%	4.44%

*Since-inception performance is calculated for the period beginning October 1, 2016.

*Performance is annualized for periods greater than 1 year.

Multi-Strategy Aggressive Composite: Cabana's Multi-Strategy Aggressive Portfolio is one of four in Cabana's Multi-Strategy Professional Series. It is designed to capture appreciation in growth assets, such as small cap equities, emerging markets and commodities during periods of economic expansion, while remaining resistant to severe market downturn. Aggressive investors seeking growth opportunities through significant equity exposure throughout the market cycle may find this portfolio attractive. It primarily invests in broad asset class ETFs among the five major asset classes. Risk parameters are managed using inversely- and non-correlated assets. This portfolio may be appropriate for investors seeking growth opportunities with tolerance to a higher volatility asset allocation. Prior to January 2024, this portfolio was known as Cabana's Target Drawdown Professional 16. Prior to January 2024, the composite was measured against the Morningstar Aggressive TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 90% SPY/10% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderate TR and US Fund benchmarks. Performance presented prior to September 17, 2020 represents the Target Drawdown 16 Composite. The Multi-Strategy Aggressive composite is compared against the Morningstar Moderate TR and the US Fund. The Multi-Strategy Aggressive composite has a minimum of \$25,000. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Multi-Strategy Aggressive composite was created in September 2020 and inception on October 1, 2016.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions and limited pooled fund descriptions are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Multi-Strategy Aggressive has had a performance examination for the periods October 1, 2016 through December 31, 2022. The verification and performance examination reports are available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring an aggregation of client-initiated significant cash inflow or outflow of at least 10% of portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

Benchmarks:

Morningstar Moderate TR - The Morningstar Moderate Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities. The Morningstar Moderate Target Risk Index generally aims for a tactical allocation of 60% global equity exposure and 40% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

*Performance is annualized for periods greater than 1 year.

Target Drawdown 5 Composite: *The Target Drawdown 5 is the most conservative of the five portfolios in Cabana's original Target Drawdown Series. The primary objective of this portfolio is to seek a limited volatility range ("target drawdown") of five percent (5%) from peak to trough. The portfolio primarily invests in broad asset class ETFs among the five major asset classes and is designed to emphasize stability by concentrating allocation to low beta assets. Targeted risk parameters are managed using inversely - and non-correlated assets. Conservative investors seeking numerically defined risk objectives and preservation of capital may find this portfolio attractive. In our view, all Target Drawdown portfolios provide a viable option for most long-term investors. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. Prior to February 2024, the composite was known as the Target Drawdown Legacy 5 Composite. Prior to January 2024, the composite was measured against the Morningstar Moderately Conservative TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 10% SPY/90% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Conservative TR and US Fund benchmarks. The Target Drawdown 5 composite is compared against the Morningstar Conservative TR and the US Fund. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Target Drawdown 5 composite was created in September 2021 and incepted on April 1, 2020.*

Target Drawdown 10 Composite: The Target Drawdown 10 is the original of the five portfolios in Cabana's original Target Drawdown Series. The objective of this portfolio is to seek a limited volatility range ("target drawdown") of ten percent (10%) from peak to trough. The portfolio primarily invests in broad asset class ETFs among the five major asset classes. Allocation is distributed among major asset classes with a sensitivity to market downturn. Targeted risk parameters are managed using inversely - and non-correlated assets. Investors seeking numerically defined risk objectives and a moderate volatility allocation may find this portfolio attractive. In our view, all Target Drawdown portfolios provide a viable option for most long-term investors. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. Model. Prior to February 2024, the composite was known as the Target Drawdown Legacy 10 Composite. Prior to January 2024, the composite was measured against the Morningstar Moderate TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 50% SPY/50% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderately Conservative TR and US Fund benchmarks. The Target Drawdown 10 composite is compared against the Morningstar Moderately Conservative TR and the US Fund. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Target Drawdown 10 composite was created in April 2016 and inception on January 1, 2012.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled funds are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2022. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Prior to September 30, 2020 composite policy required the temporary removal of any portfolio incurring an aggregation of client-initiated significant cash inflow or outflow of at least 10% of portfolio assets. Prior to December 31, 2014 there was no significant cash flow policy in place. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Net of fee performance was calculated using a model asset-based fee of 2.00%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Prior to February 28, 2017 net-of-fee returns were calculated using a model fee of 3%. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

Benchmarks:

Morningstar Moderately Conservative TR - The Morningstar Moderately Conservative Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities. The Morningstar Moderately Conservative Target Risk Index generally aims for a tactical allocation of 40% global equity exposure and 60% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

Target Drawdown 13 Composite: The Target Drawdown 13 is one of five portfolios in Cabana's original Target Drawdown Series. The objective of this portfolio is to seek a limited volatility range ("target drawdown") of thirteen percent (13%) from peak to trough. The portfolio primarily invests in broad asset class ETFs among the five major asset classes. Its allocation allows for potential capital appreciation of growth assets during times of favorable conditions, while maintaining its targeted risk parameters through exposure to inversely - and non-correlated assets during periods of less favorable market conditions. Like other Target Drawdown products, this portfolio numerically defines risk objectives, but may be appropriate for investors seeking growth opportunities with tolerance to a higher volatility asset allocation. In our view, all Target Drawdown portfolios provide a viable option for most long-term investors. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. Prior to February 2024, the composite was known as the Target Drawdown Legacy 13 Composite. Prior to January 2024, the composite was measured against the Morningstar Moderately Aggressive TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 75% SPY/25% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderate TR and US Fund benchmarks. The Target Drawdown 13 composite is compared against the Morningstar Moderate TR and the US Fund. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Target Drawdown 13 composite was created in July 2017 and inception on October 1, 2016.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Target Drawdown 16 Composite: The Target Drawdown 16 is one of five portfolios in Cabana's original Target Drawdown Series. The objective of this portfolio is to seek a limited volatility range ("target drawdown") of sixteen percent (16%) from peak to trough. The portfolio primarily invests in broad asset class ETFs among the five major asset classes. Allocation is weighted toward higher beta growth assets during all but the most unfavorable market conditions. It is designed to capture appreciation in growth assets, such as small cap equities, emerging markets and commodities during periods of economic expansion, while remaining resistant to severe market downturn. Aggressive investors seeking growth opportunities through significant equity exposure throughout the market cycle may find this portfolio attractive, but like all Target Drawdown products, it numerically defines risk objectives and manages targeted risk parameters using inversely - and non-correlated assets. In our view, all Target Drawdown portfolios provide a viable option for most long-term investors. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. Prior to February 2024, the composite was known as the Target Drawdown Legacy 16 Composite. Prior to January 2024, the composite was measured against the Morningstar Aggressive TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 90% SPY/10% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderate TR and US Fund benchmarks. The Target Drawdown 16 composite is compared against the Morningstar Moderate TR and the US Fund. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Target Drawdown 16 composite was created in July 2017 and incepted on October 1, 2016.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Target Beta 35 Composite: The Cabana Target Beta 35 Portfolio is an all-asset, fund of funds strategy comprised of underlying equities, commodity and fixed income funds intended to represent a moderately conservative target risk allocation. The portfolio's primary objective is to target a maximum aggregated beta of .35 compared to the equal weight S&P 500 (benchmark). Cabana uses a semi-active "tactical" process whereby Cabana's Cyclical Asset Allocation Algorithm ("CARA") seeks to identify macro changes in the economic cycle and allocate investment to the assets that perform relatively well at the identified point in the cycle. For purposes of allocation, the portfolio relies on a two scene (bullish or bearish) version of CARA. Positions in the bullish scene are intended to reach the beta target of .35 while positions in a bearish scene may result in a beta less than .35. This allows for the aggregated portfolio to be optimized for gain and also maintain the target maximum beta as a whole and throughout the defined business cycle. The portfolio seeks to reduce costs and whipsaw associated with more active management and focuses on aspects of portfolio construction that can be controlled by the asset manager. Beta is calculated based upon the one-year beta of the underlying positions and re-optimization occurs upon scene change. If no such opportunity has occurred within a calendar year, the portfolio is re-optimized at year's end. In sum, this Target Max Beta Portfolio seeks to provide a repeatable investment experience across market cycles and simultaneously take advantage of CARA's allocation process. Incidental benefits may include reduction in some of the risks of active management, such as poor security selection, high turnover and trading costs such as slippage. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Conservative TR and US Fund benchmarks. The Target Beta 35 composite is compared against the Morningstar Conservative TR and the US Fund. The Target Beta 35 composite was created in September 2023 and incepted on September 1, 2023.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Benchmarks:

Morningstar Conservative TR - The Morningstar Conservative Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities. The Morningstar Conservative Target Risk Index generally aims for a tactical allocation of 20% global equity exposure and 80% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

Year End	Total Firm Assets (USD) (Millions)	Composite Assets (USD) (Thousands)	Number of Portfolios	Composite Returns Gross	Composite Returns Net	Morningstar Moderately Conservative TR Benchmark Returns	US Fund Benchmark Returns	Composite Dispersion	Composite 3-Yr Std Dev	Morningstar Moderately Conservative TR Benchmark 3-Yr Std Dev	US Fund Benchmark 3-Yr Std Dev
2023*	753.54	46.65	≤5	5.58%	4.88%	5.12%	4.05%	N/A ¹	N/A ²	N/A ²	N/A ²

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

* Performance is for a partial period from September 1, 2023 to December 31, 2023.

Period - As of 12/31/2023	Gross Returns	Net Returns	US Fund Returns	Morningstar Moderately Conservative TR Returns
Since-Inception	5.58%	4.88%	4.05%	5.12%

*Since-inception performance is calculated for the period beginning September 1, 2023.

*Performance is annualized for periods greater than 1 year.

Target Beta 50 Composite: The Cabana Target Beta 50 Portfolio is an all-asset, fund of funds strategy comprised of underlying equities, commodity and fixed income funds intended to represent a moderate target risk allocation. The portfolio's primary objective is to target a maximum aggregated beta of .50 compared to the equal weight S&P 500 (benchmark). Cabana uses a semi-active "tactical" process whereby Cabana's Cyclical Asset Allocation Algorithm ("CARA") seeks to identify macro changes in the economic cycle and allocate investment to the assets that perform relatively well at the identified point in the cycle. For purposes of allocation, the portfolio relies on a two scene (bullish or bearish) version of CARA. Positions in the bullish scene are intended to reach the beta target of .50 while positions in a bearish scene may result in a beta less than .50. This allows for the aggregated portfolio to be optimized for gain and also maintain the target maximum beta as a whole and throughout the defined business cycle. The portfolio seeks to reduce costs and whipsaw associated with more active management and focuses on aspects of portfolio construction that can be controlled by the asset manager. Beta is calculated based upon the one-year beta of the underlying positions and re-optimization occurs upon scene change. If no such opportunity has occurred within a calendar year, the portfolio is re-optimized at year's end. In sum, this Target Max Beta Portfolio seeks to provide a repeatable investment experience across market cycles and simultaneously take advantage of CARA's allocation process. Incidental benefits may include reduction in some of the risks of active management, such as poor security selection, high turnover and trading costs such as slippage. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Moderately Conservative TR and US Fund benchmarks. The Target Beta 50 composite is compared against the Morningstar Moderately Conservative TR and the US Fund. The Target Beta 50 composite was created in September 2023 and incepted on September 1, 2023.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled funds are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2022. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

Benchmarks:

Morningstar Moderately Conservative TR - The Morningstar Moderately Conservative Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities. The Morningstar Moderately Conservative Target Risk Index generally aims for a tactical allocation of 40% global equity exposure and 60% global bond exposure.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. These funds may have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the tactical allocation category, the fund must have minimum exposures of 10% in bonds and 20% in equity. Next, the fund must historically demonstrate material shifts in sector or regional allocations either through a gradual shift over three years or through a series of material shifts on a quarterly basis. Within a three-year period, typically the average quarterly changes between equity regions and bond sectors exceeds 15% or the difference between the maximum and minimum exposure to a single equity region or bond sector exceeds 50%.

Target Income Composite: The Target Income Composite is designed for conservative investors seeking a steady stream of income, while minimizing sequence of return risk as well as overall drawdown through a tactical allocation model. The portfolio seeks a yield in excess of 4%, with a goal to increase as interest rates rise. The portfolio primarily invests in broad asset class ETFs among the five major asset classes and is designed to emphasize stability by concentrating allocation to low beta assets. Risk is managed using inverse and non-correlated assets. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. On September 17, 2020, Cabana released a series of Target Drawdown ETFs that follow the firm's flagship Target Drawdown Strategy. The Target Income Portfolio will invest in various Cabana Target Drawdown ETFs, with the goal of providing a foundation of stability, consistent yield and historical performance. Other third-party ETFs make up the remainder of the portfolio in order to seek to satisfy the underlying objectives of the strategy. Prior to January 2024, the composite was measured against the Morningstar Moderately Conservative TR and US Fund benchmarks. The retroactive change replaced these benchmarks with the AGG and the custom blended benchmark 25% SPY/75% AGG. In April 2024, the benchmarks were changed and replaced retroactively by the Morningstar Conservative TR and US Fund benchmarks. The Target Income composite is compared against the Morningstar Conservative TR and the US Fund. The Target Income composite has a minimum of \$25,000. The Target Income composite was created in April 2021 and incepted on June 1, 2021.

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments.
