NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 months of data is available.

Target Drawdown Legacy 10 Composite: *The Target Drawdown Legacy 10 is the original of the five portfolios in Cabana's original Target Drawdown Legacy Series. The objective of this portfolio is to seek a limited volatility range ("target drawdown") of ten percent (10%) from peak to trough. The portfolio primarily invests in broad asset class ETFs among the five major asset classes. Allocation is distributed among major asset classes with a sensitivity to market downturn. Targeted risk parameters are managed using inverse and non-correlated assets. Investors seeking numerically defined risk objectives and a moderate volatility allocation may find this portfolio attractive. In our view, all Target Drawdown portfolios provide a viable option for most long-term investors. This portfolio differs from Cabana's Target Drawdown Professional 10 in that proprietary Target Drawdown ETFs are not used in this portfolio or any other Legacy Model. Key risks include the potential for asset depletion, which could cause the composite to underperform the benchmark. Model. Prior to September 2020, and the launch of the Cabana target drawdown series ETFs, this composite was known as the Target Drawdown Professional 10. The name Target Drawdown Professional 10 is now used for a new composite utilizing Cabana's ETFs. Prior to May 2021, the composite was known as the Legacy Target Drawdown Professional 10. The Target Drawdown Legacy 10 composite is compared against the Morningstar Moderate TR, the SPY and the US Fund. Prior to September 30, 2020, the composite had a minimum of \$10,000. The Target Drawdown Legacy 10 composite was created in April 2016 and incepted on January 1, 2012.*

Cabana Asset Management ("Cabana") is an SEC registered investment firm with offices in Arkansas, Texas, and Colorado. Cabana's proprietary algorithm was designed with the primary objective of limiting portfolio losses to a predetermined "target drawdown" percentage during down markets so that clients will stay invested and therefore, be positioned to participate in up markets. Cabana's Target Drawdown Professional Series SMAs (separately managed accounts) invest in diverse, index-based, low-cost and highly liquid exchange traded funds (ETFs) and mutual funds with a strong history of consistent dividend payments. The portfolios use conservative expectations to manage "drawdown", the maximum amount an investment can be expected to fall during a specific period while remaining fully invested. Cabana provides asset management services to individual investors and businesses, as well as sub-advisory services to financial institutions and 401K plans. The firm's full list of composite descriptions and limited pooled fund descriptions are available upon request.

Cabana claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cabana has been independently verified for the periods January 1, 2012 through December 31, 2019. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Target Drawdown Legacy 10 has had a performance examination for the periods January 1, 2012 through December 31, 2019. The verification and performance examination reports are available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring an aggregation of client-initiated significant cash inflow or outflow of at least 10% of portfolio assets. Prior to September 30, 2020 the significant cash flow value was of 10%. Prior to February 28, 2017 there was no significant cash flow policy in place. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. Net-of-fee returns are calculated using a model fee of 2%. Model fees are based on the highest fee-payer in the composite. Net-of-fee returns are calculated by deducting the applicable monthly rate of the model fee from the gross returns for each account in the composite. Prior to February 28, 2017 net-of-fee returns were calculated using a model fee of 3%. Composite dispersion is measured by the equal-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee for the composite includes an asset-based fee of 2.00%. Actual investment advisory fees incurred by clients are negotiable and may vary.

Due to market conditions in July and August 2015, portfolios in this strategy were liquidated and held in cash plus a 10% position in VIX. After this period all accounts were reinvested in the strategy as defined in the composite description. The firm experienced a material increase in assets under management beginning in 2016 due to the firm's marketing of its sub-advised services to outside managers.

Benchmarks:

SPY - SPY is an ETF that tracks the performance of 500 leading U.S. publicly traded companies. The ETF returns reflect the deduction of all expenses and transaction costs incurred by the SPY ETF. As of 31 December 2019, the expense ratio was 0.09%. The SPY ETF returns reflect the closing prices, which are determined by the last traded price of the ETF.

Morningstar Moderate TR - The Morningstar Moderate Target Risk Index is one of five asset allocation indexes that span the risk spectrum from conservative to aggressive. This index is based on a well-established asset allocation methodology from Ibbotson Associates. The securities selected for this index are driven by rules-based indexing methodologies that are designed to deliver pure asset-class exposure. This index covers a global set of stocks, bonds, and commodities.

US Fund - Morningstar's Tactical Allocation Category comprises active/tactical asset allocation funds into a weighted index. Managers in this category have the discretion to adjust the allocation as necessary according to market conditions. In September of 2019, the Morningstar Tactical Allocation Category Index was added to better represent an active, or tactical, allocation of assets.
